ISIN code: SE0000428336

Didner & Gerge Fonder AB

### Objective and Investment Policy

The fund’s name is Didner & Gerge Aktiefond, hereinafter called the fund. The long term financial objective of the fund, i.e. a period of five years or more, is to achieve a value-rate increase in the fund’s share value. The fund is an equity fund whose assets must be at least 90% invested in equities and equity transferable securities. Out of these investments, at least 80% must be in equities and equity-related transferable securities in Sweden. The fund is permitted to invest in transferable securities, mutual funds, Swedish treasury bills and bank deposits. “Transferable securities” denotes equities and equity-related transferable securities. The fund is actively managed and invests on a discretionary

basis without reference to any index. The fund will normally not to trade in derivatives. The fund may use derivatives only to a limited extent and with the aim to make management more efficient. The fund uses SIX Return as benchmark.

Recommendation: Didner & Gerge Aktiefond may not be appropriate for investors who plan to withdraw their money within five years. The investors must be able to accept that substantial price fluctuations may occur.

Subscription and redemption of units may normally be made every weekday. The fund pays no dividends; all dividends are reinvested in the fund.

### Risk and Reward Profile

The synthetic risk/reward indicator shows the potential risk and reward for an investment in the fund. The synthetic indicator is based on the fluctuation in the fund’s value over the past five years. Didner & Gerge Aktiefond belongs to category 6. This means that the fund is subject to higher risk in respect of rises and falls in value. Category 1 does not mean that the fund is a risk-free investment. The fund may over time shift both to the right and to the left side of the scale. Since the synthetic indicator

is based on historical data, it is not a guarantee for future risk or reward. Didner & Gerge Aktiefond invests in listed companies which generally are characterized by high risk, but also by potential high return. The synthetic indicator mainly reflects the volatility of the equities the fund is invested in.

The following risks are considered important but are not reflected in the risk indicator:

**Operational risk.** This is the risk of the fund’s value being affected negatively by failures in internal processes and controls related to the funds’ trading, valuation and day-to-day operations.
