Didner & Gerge Småbolag

ISIN code: SE0002699421

Didner & Gerge Fonder AB

Objective and Investment Policy

The fund's name is Didner & Gerge Småbolag, hereinafter called the fund. The long term financial objective of the fund, i.e. a period of five years or more, is to achieve a value-rate increase in the fund's share value. The fund is an equity fund that may invest in equities and equity-related transferable securities of small and medium-sized businesses. The criterion for a company's size is its stock market value, which at the time of investment may not exceed one percent of the stock market's total market value in Sweden. Data for the stock market's total market value in Sweden is taken from the latest available statistical monthly report from the NASDAQ OMX Nordic Exchange. At least 80% of the fund must be invested in equities and equity-related transferable securities. At least 3/4 of these investments must be made in equities and equity-related transferable securities issued by companies

based in Sweden, Denmark, Norway or Finland. The selection of shares and the allocation between different sectors and regions are not predetermined, which means that the portfolio from time to time may be concentrated to a few sectors and regions. The fund is an actively managed fund and invests on a discretionary basis without reference to any index. The fund will normally not trade with derivatives. The fund may use derivatives only to a limited extent and with the aim to make management more efficient. The fund uses CSRX as benchmark.

Recommendation: Didner & Gerge Småbolag may not be appropriate for investors who plan to withdraw their money within five years. The investors must be able to accept that substantial price fluctuations may occur.

Subscription and redemption of units may normally be made every weekday. The fund pays no dividends; all dividends are reinvested in the fund.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The synthetic risk/reward indicator shows the potential risk and reward for an investment in the fund. The synthetic indicator is based on the fluctuation in the fund's value over the past five years. Didner & Gerge Småbolag belongs to category 6. This means that the fund is subject to higher risk in respect of rises and falls in value. Category 1 does not mean that the fund is a risk-free investment. The fund may over time shift both to the right and to the left side of the scale. Since the synthetic indicator is based on historical data, it is not a guarantee for future risk or reward. Didner & Gerge Småbolag invests in listed companies which generally are characterized by high risk, but also by potential high return. The synthetic indicator mainly reflects the volatility of the equities the fund is invested in.

It does not reflect the level of liquidity risk. During extreme market conditions, an investor might not be able to receive cash from redeemed shares within the stated days of settlement.

The following risks are considered important but are not reflected in the risk indicator:

Liquidity risk. This is the risk of it not being possible to sell a security at a given time without a significant price reduction. This risk is greater for securities with low turnover. Equities that are traded on a regulated market normally have good liquidity even during periods of volatility. The fund invests a large part of its assets in small companies, which increases the liquidity risk as it may affect the fund's ability to sell holdings at limited cost, and payment of redemption proceeds to unitholders may need to be delayed in the event of large outflows.

Operational risk. This is the risk of the fund's value being affected negatively by failures in internal processes and controls related to the funds' trading, valuation and day-to-day operations.

Charges

One-off charges applicable before you invest

Entry charge	0 %
Exit charge	0 %

This is the maximum that might be charged before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing charges	1.40 %
-----------------	--------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges are the maximum charges. At the moment no entry or exit charges are applied.

The ongoing charges are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.

Ongoing charges represents the calendar year 2021. It may vary from one year to another.

Past performance

The fund's performance (return) is calculated after deduction of ongoing charges. The possible entry and exit charges have not been taken into account. The performance for all years has been calculated in Swedish kronor and with dividends reinvested in the fund.

The fund came into existence in 23/12/08. **Past performance is not a guarantee for future performance.**
